

Engineering and Construction Management

Department Mission: The Inland Empire Utilities Agency's (IEUA) Engineering and Construction Management Department's mission is to provide project management services to oversee construction of water, wastewater, and energy projects that implement the IEUA's Capital Improvement Program. Management, inspection, and construction of the project design integrate the latest, most cost-effective technology into the IEUA service area. The department is committed to constructing state of the art facilities and infrastructure to meet the dynamic and growing water importation, recycled water demand, wastewater collection, treatment, and disposal needs of IEUA's service area with well-managed and cost-effective solutions. The ongoing participation of contractors makes this possible. IEUA regularly solicits bids and proposals for construction design, equipment pre-purchase, installation, and consulting services. Opportunities for bid and proposal participation can be obtained on www.IEUA.org under Doing Business with IEUA.

Budget

- IEUA's Engineering and Construction Management Department's current Ten Year Capital Improvement Program Budget is \$700 Million.

Bid and Proposal Information

- Opportunities for bid, proposal, and pre-qualification participation are regularly posted on IEUA's website through PlanetBids. Registration for PlanetBids is quick and easy at <https://www.planetbids.com/portal/portal.cfm?CompanyID=27411>.

Pre-Qualification of Contractors

- IEUA utilizes a pre-qualification process for bidding all public works projects. Information regarding pre-qualification can be accessed through PlanetBids at <https://www.planetbids.com/portal/portal.cfm?CompanyID=27411>.

Request For Proposals (Design Consulting Engineers)

- Engineering designs are solicited through a Request for Proposal on a project-by-project basis either through an advertisement sent through PlanetBids or to the list of consultants currently on IEUA's master design service contact list. **The next solicitation to be added to the master list will be Spring 2018.**

Projects Under \$2 Million (Contractors)

- Projects under \$2 million consist of a pool of contractors separated by trade. Contractors can be added on a bi-annual basis (odd year) by submitting a prequalification package. Notification of prequalification advertisement is sent through PlanetBids. **The next solicitation will be Spring 2017.**

Projects Larger than \$2 Million (Contractors)

- Projects larger than \$2 million have a separate prequalification issued based on the project scope. **Current and future RFQ's can be found on PlanetBids.**

Minor Construction Projects (Contractors)

- Minor construction projects are solicited through a Request for Proposal to the list of qualified contractors. Contractors can be added to the list on a bi-annual basis (odd year) by submitting a prequalification package. Notification of prequalification advertisement is sent through PlanetBids. **The next solicitation to be added to the list will be Spring 2017.**

Emergency Construction Projects (Contractors)

- Emergency construction projects have three different levels of urgency. Requests are issued to a qualified list of contractors via email. Contractors can be added to the list on a bi-annual basis (odd year) by submitting a prequalification package. Notification of prequalification advertisement is sent through PlanetBids. **The next solicitation to be added to the list will be Spring 2017.**
