The Inland Empire Utilities Agency Launches New Agency Website

Inland Empire, California – The Inland Empire Utilities Agency (IEUA/Agency) is pleased to announce the launch of its fully featured website re-design. The updated site has extensive content and features that will enable the site visitor to navigate through information in an effortless manner.

The site features GIS (Geographic Information System) mapping, a live social media feed, and a calendar of upcoming Agency events. To help make navigating the site easier, the home page also features categories of possible visitors, including community members; teachers/students; vendors; job seekers; member agencies; and members of the media. When clicking on a specific category, the visitor will be directed to a landing page featuring content and links that would be most likely to interest that specific visitor. In addition, there is now a Governance tab that includes a transparency link. As a public agency, IEUA is committed to the highest standards of quality, fiscal responsibility, efficient business practices, and accountability, and this new link includes information on financial reports, the 10-Year Capital Improvement Plan, and information on public records requests.

“The new website re-design was constructed in order for the community and stakeholders to find information in an uncomplicated manner. Providing open and transparent information is an imperative goal for the Agency and the newly designed website will aid in reaching this objective,” stated IEUA Board President Terry Catlin.
