

Hamburger Water Model

Kindergarten-5th Grade

Activity Fact Sheet

Objective

To educate on water consumption through the process of agriculture, and the impact of water importance for daily food consumption.

Overview

Students will observe a three-dimensional model of a cheeseburger and learn how much water is used to make each part. Students will establish a connection to how much water goes into the production of our food supply. Students will make a key-ring of the cheeseburger model with construction paper as a reminder of how many gallons of water it takes to make a single cheeseburger.

Length of Time

20-30 minutes

Water Discovery Field Trip Program
