

# The Long Haul

**4th-12th Grade**

*Activity Fact Sheet*

## **Objective**

To develop an awareness of various volumes of water, appreciation of readily available water supplies in the developed world, and an understanding of how easy access to water can encourage people to use large amounts of water.

## **Overview**

Students will develop an awareness and appreciation of water's value and availability. This activity will focus on worldwide and historical access to water. Students will participate in a relay to move "buckets of water" between two points demonstrating the difficulty of hauling water.

## **Length of Time**

20-30 minutes
