ACTION ITEM

ADOPTION OF THE IEUA ADMINISTRATIVE HANDBOOK
General Counsel Jean Cihgoyenetchi stated that this item of the Administrative Handbook was brought to a Board Workshop meeting in December 2017. At the end of that workshop, the Board had no additional comments. However, there are two changes to the document being brought forth today. First, on Chapter 8 regarding the complaint procedures from employees, Board members, or members of the public regarding ethical violations. Typically, those concerns will be directed to the General Counsel to determine the process. Historically, the time perimeters provided by Resolution 2015-2-9, provide a 15-day investigation and review period. In the Administrative Handbook, the Agency sought to lengthen this time period because it has been difficult to complete the investigation and review in the 15-day time frame. Labor representatives felt that this was a material change to the existing policy and there should be a negotiation before a change is made. Therefore, the change in section 8 is reverting back to the original complaint procedures. The second change was prompted by a conversation that took place in a Board workshop about the fiduciary responsibilities of the elected officials. Included in section 6.1 of the Administration Handbook is a brief paragraph that explains the elected official's fiduciary obligations. In concurrence with the law, the Administrative Handbook states that elected official's fiduciary obligations lie with the Inland Empire Utilities Agency. Discussion ensued about particular cases of this obligation.

Upon motion by Director Camacho, seconded by Director Hofer, and unanimously carried:

M2018-1-2

MOVED, to adopt the updated IEUA Administrative Handbook.

INFORMATION ITEMS

ENGINEERING AND CONSTRUCTION MANAGEMENT PROJECT UPDATE
Deputy Manager of Engineering Jerry Burke gave a PowerPoint presentation on the Engineering and Construction Management project updates. He provided updates on the following projects: DL37141 – CDA Structures Coating; EN11031 – RP-5 Flow Equalization; EN16021 – TCE Plume
President Elie stated that he would like to see the percentage of change orders especially for the more completed projects at future meetings. Director Camacho requested that if the change orders can be specified as changes Agency had requested or caused by unforeseen circumstances.

**MWD UPDATE**
Senior Engineer Jason Pivovaroff gave an update on the MWD water conditions & sales and rates & charges. He stated that the North Sierra precipitation was at 71 percent, about 16 inches to date. Regarding snowpack, it is 18 percent above normal and at 2.2 inches of snow water equivalent. Storage for the Oroville and San Luis Reservoir is at 54 percent. In regard to the supply and demand outlook, allocation is currently at 15 percent. If it doesn’t change throughout the water year, MWD is forecasting a shortfall of 350,000 AF. To allow the supply and demand to balance, MWD is looking at a demand of 25 to 50 percent. The Agency has a Dry-Year Yield Program with MWD to replenish surplus supply into the Chino groundwater basin and based on the lower initial allocation and their goal of meeting put capacities, MWD will most likely stop their deliveries into the Chino Basin.

MWD is conducting a cost of service for FY 2018/19 and 2019/20. The current finance plan shows the cost of service at $738 per acre feet (AF) by 2019 and $783 per AF by 2020. Discussion ensued about the Oroville Dam construction.
