• IEUA wastewater connection fees currently in place do not pay for investments in the regional water system.
• With growth increasing, population is expected to reach **1.2 million within the next 20 years**.
• $91 million in expanded and new water infrastructure is needed to support **recycled water, regional resiliency and water conservation projects**.
• IEUA has a responsibility to ensure that the regional water system is financially sound.
• Without the new fee, **$91 million of regional water reliability projects needed to meet growth will be unfunded**.
• **Proposition 26** mandates costs should be reasonable and appropriately allocated to payers based on the benefit received.
• **A comprehensive rate study in 2014 established the proposed fee.**
